SUMMARY

AI/ML Developer with hands-on experience in Machine Learning, Deep Learning, and Computer Vision, seeking an opportunity to apply technical expertise to real-world challenges.

EDUCATION

Bachelor of Technology , JIMS Engineering Management Technical Campus (GGSIPU)	2022 - 2026
Artificial Intelligence and Machine Learning	8.73

SKILLS

Technical Skills	Python, SQL, Machine Learning, Data Science, Computer Vision, Deep Learning, Fine-tuning, Natural Language Processing, Generative AI, Prompt Engineering, AWS.
Tools & framework	Git, GitHub, Linux, PyTorch, TensorFlow, Keras, Langchain, Flask, FastAPI.
Soft Skills	Teamwork, Communication, Problem Solving, Adaptability, Persistency

EXPERIENCE

Analytics and AI Developer Intern IntelliSQR	July 2025 – Sep2025
--	---------------------

- Fine-tuned and benchmarked multiple LLMs / multi-modal models for real-world enterprise projects, improving task-specific performance.
- Built scalable document intelligence pipelines for government document parsing, leveraging OCR + NLP techniques for structured information extraction.
- Built Gen-AI solutions, like a university chatbot with enrollment functionality, leveraging LangGraph.

Machine Learning Intern Appinnovix	Nov 2024 – Jan 2025
--	---------------------

- Fine-tuned and served AI models for mobile applications like spam classification.
- Executed EDA, preprocessing, feature engineering, and dataset preparation using Python.

PROJECTS

Document Tamper Detection

Built and fine-tuned a multi-modal deep learning pipeline using Qwen2-VL for document tamper detection, including dataset preparation, annotation, training, and evaluation, achieving 83% accuracy.

AI-Recruiter

Built a Flask-based backend for a multi-modal interview analysis platform, implementing audio/video confidence analysis and deception detection modules with REST API integration, [\[GitHub\]](#)

Marksheet Processor

Built a YOLOv8-based computer vision pipeline to detect and extract key fields from marksheet images using custom dataset annotation and OCR, achieving 92% extraction accuracy. [\[GitHub\]](#)

ACHIEVEMENTS

2nd Place – BitWARS Hackathon (2025)

Built a sign language transcription system using a CNN–LSTM architecture. [Certificate URL](#)

LICENSES & CERTIFICATIONS

Anaconda: Python for Data Science Professional Certificate

LinkedIn: Advanced AI: Transformers for Computer Vision

LinkedIn: Deploying Scalable Machine Learning for Data Science
