EDUCATION

Bachelor of Technology , Guru Gobind Singh Indraprastha University (GGSIPU)	2022–2026
Computer Science	8.6
CBSE Senior Secondary (XII) , Bal Mandir Sr. Sec. School	2022
Computer Science	8.3

EXPERIENCE

Frontend Developer Intern	Nov 2024 - Jan 2025
Appinnovix	
– Accomplished improved application performance and accessibility, by 30%, through developing responsive, cross-browser user interfaces using HTML5, CSS3, and ES6+ JavaScript. – Enhanced UI scalability and consistency, by 40%, through building modular React components using React Hooks, and Redux Toolkit. – Achieved smoother SPA navigation and faster feature delivery, by 25%, through implementing React Router.	
Freelance	Jan 2026 - Feb 2026
BL Digital Solutions	Visit Website
– Designed and developed the complete frontend architecture using React.js, building scalable and reusable components from scratch. – Implemented React Router for seamless SPA navigation and Redux Toolkit for efficient global state management. – Optimized performance and responsiveness, ensuring cross-browser compatibility and smooth user experience.	

SKILLS

Technical Skills	React.js, Node.js, Express.js, SQL, MongoDB , JavaScript, HTML, CSS ,Tailwind CSS, React Router, Redux Toolkit, React Hooks, Firebase, OOPs ,Java , C#, C++, DSA (LeetCode – 150+ problems)
Tools & Version Control	GitHub, VS-Code, Postman
Soft Skills	Leadership, Teamwork, Communication, Problem Solving, Adaptability

PROJECTS

AI Interviewer	GitHub
–Engineered an interactive React + Vite frontend integrated with Firebase Authentication and Firestore for secure user access and real-time data handling. –Implemented dynamic interview question delivery and domain-specific practice workflows to simulate real AI-driven interviews.	
MERN Notes Management App	Notes-app
–Developed and Deployed a full-stack Notes App to create, edit, and delete notes (CRUD functionality). –Integrated frontend with backend for real-time data storage and retrieval. –Designed a responsive UI using React for smooth user experience.	
CastVote API	Github
–Built a RESTful backend for a voting system using Node.js and Express with a modular architecture separating routes and Mongoose models. –Implemented secure user authentication using JWT (JSON Web Tokens) and bcrypt for password hashing to protect voting routes from unauthorized access. –Designed and integrated a MongoDB database with Mongoose schemas to persistently store user data and candidate vote counts, ensuring data integrity across API requests.
